

National Action Plan GHG Emission Reduction in Forestry Sector

Indonesia

Climate Change Mitigation

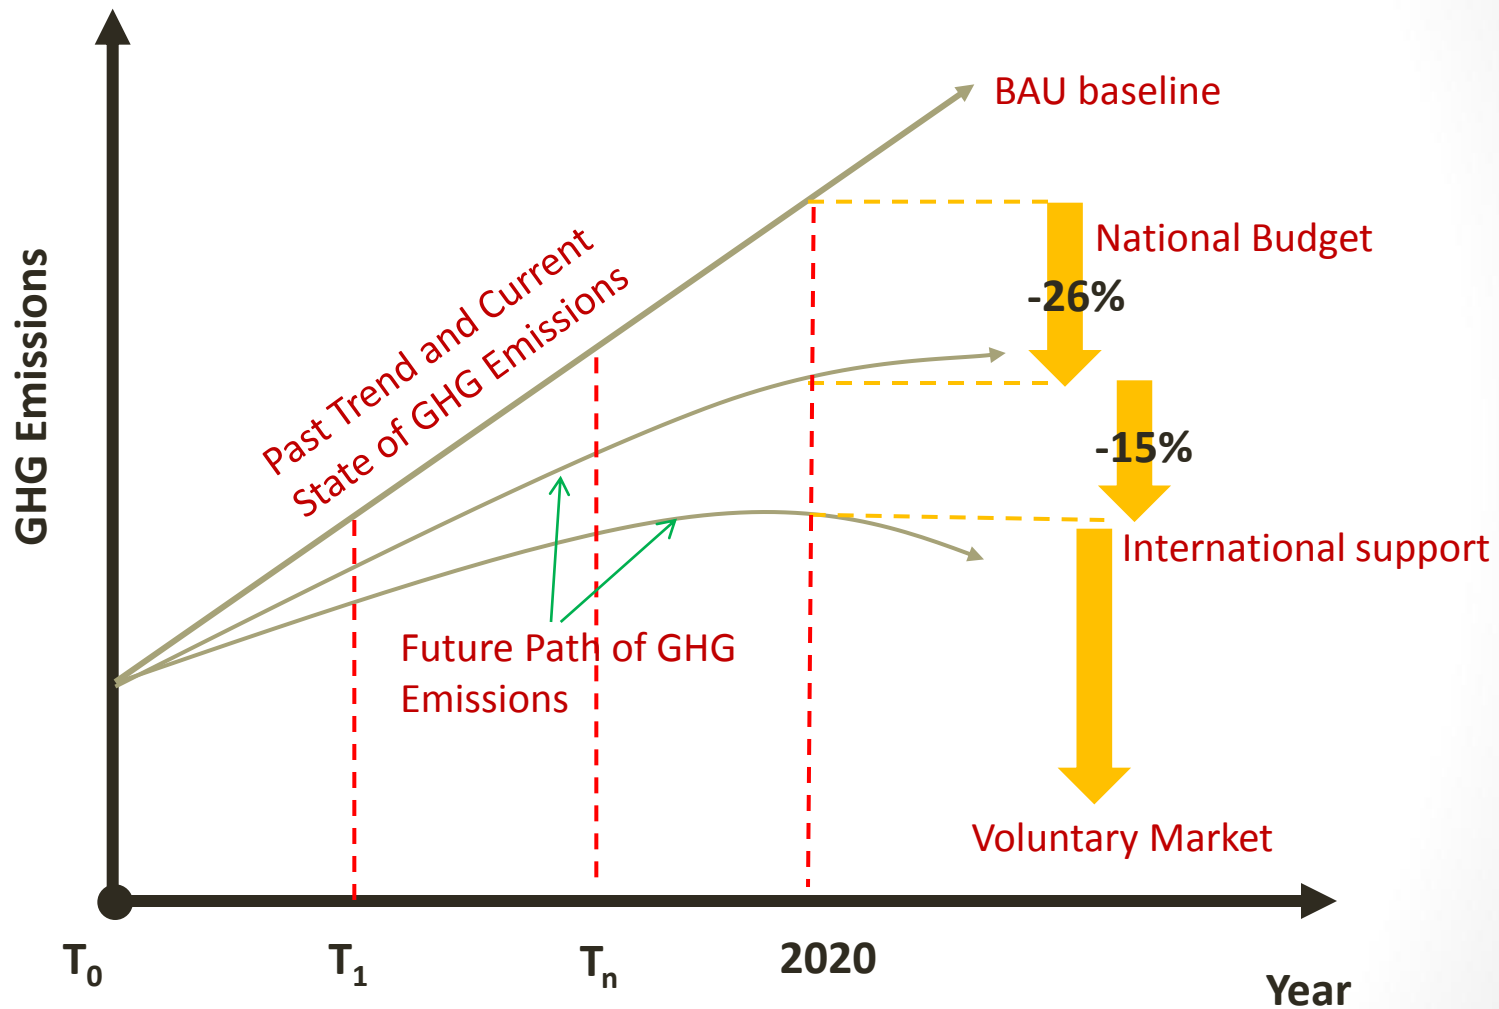

The NAP for GHG Emission Reduction (RAN-GRK) is the workplan document for the implementation of activities to reduce GHG emission in accordance with the national development targets.

Targets of Indonesia Emission Reduction

Sector	Reduction Target (Gton CO2e)	
	26%	41%
Forestry and Peat Land	0.672	1.039
Agriculture	0.008	0.011
Energy and Transportation	0.036	0.056
Industry	0.001	0.005
Waste Management	0.048	0.078
Total	0.767	1.189

Reducing GHG Emission by 2020

Thank You
