Big Lessons Learned

- Improved knowledge on CC curriculum
- Improved active learning techniques
- Regional collaborative effort in curriculum development
- Effective teaching tool and regional expert sharing through video conferencing
- Sharing of experiences and case studies across regions
- Networking among the lecturers
- Enhanced motivation and determination in implementation of CC in Malaysian Universities
Major Challenges

• Support from Universities and Ministry Officers
• Funding for training and capacity building
• Lack of awareness among public and policy makes
• Instilling knowledge and awareness on CC in primary and secondary schools
• Lack of learning materials in Bahasa Melayu
• Capacity building and training for pre-service and in-service teachers
Key Messages for Universities Leaders

• Full support for climate change education
  – Create secretariat for CC education
• Provide funding for CC development
• Allow curriculum sharing across Malaysian universities
Key Messages for Donors

• Thanks for the opportunity in RECCCD
• Provide continuous support for these activities
Ways to move forward

Climate Change Education Camp to promote CC Clubs in Schools
TOT for in-service and pre-service teachers
Research collaborations among universities
Credit transfers cross universities for CC education
Create a consortium for CC education among Malaysia universities
