National level accounting preliminary perspectives from UN-REDD VN

A. Inoguchi
October 2013
Some principles for thought

1. Will there be any “REDD+ projects” in VN?
2. MRV at national level, monitoring at local level; Carbon revenues at national level, localized “incentives” at local level
3. All land use sector changes (in and to/from forests) will be MRV-ed; there is no such thing as a “REDD+ activity” they will all count *1
4. “REDD+ Benefits” only within the context of “REDD+ Outcomes”
5. Prospects for REDD+ revenue for Vietnam are limited; VN should engage in a “no-regrets” REDD+ scenario

*1 Unless, VN decides that it doesn’t want to include some things under REDD, and adjusts their REL/RL in that manner.
