Ways to Move Forward to Advancing Climate Change Education in Papua New Guinea

University of Papua New Guinea
Papua New Guinea University of Technology

Bangkok, August 14, 2015
Big Lessons Learned

• Climate change curriculum has good potentiality to be taught here in region

Major Challenges

• Approval process of curriculum in PNG is lengthy
• Lack of fund to print and publish SES-Pacific Module which is in the preparation process
• Limited teaching capacity and lack of teaching staff

Key Messages

• Resources, especially funding, are needed to outreach the curriculum materials to a larger number of professors in PNG
Ways to move forward:

1. Due to distance of PNG to the world, it is good to create int’l platforms for closer linkages and connections, including Facebook, shared G.Drive.

2. E-library should be created to facilitate access to updated and relevant materials for teaching and research.

3. A webpage should be created to host the package of curriculum materials and facilitate the exchange amongst universities across the region and with the US universities.
